Interview Preparation Notes

1. Tell me about yourself

Situation: I am currently doing a WIL project developing a Nursing System Portal website.
Task: My role includes contributing to front-end and back-end development, collaborating with the team, and maintaining professional communication.
Action: I have developed pages using HTML/CSS/JS, integrated back-end with JAVA, and updated tasks on Trello.
Result: I improved my technical skills, collaboration, and project management abilities.

2. Describe a project you contributed to

Situation: Nursing System Portal is a 6-month WIL project to manage patient records and appointments.
Task: My task was to develop specific website features and assist the team with database integration.
Action: I wrote code for dashboard pages, patient record management, and integrated MySQL database.
Result: The features function correctly, and the team workflow improved.

3. How do you handle challenges or conflicts in a team?

Situation: During the WIL project, team members sometimes disagreed on task priorities.
Task: Resolve conflicts professionally and maintain teamwork.
Action: I actively listened to concerns, suggested compromises, and documented agreements on Trello.
Result: Team conflicts were minimized, and collaboration improved.

4. What are your strengths and weaknesses?

- **Strengths:** Technical skills, teamwork, problem-solving, and professional communication.

- **Weaknesses:** Can sometimes overanalyze tasks; working on prioritizing effectively.

5. Where do you see yourself in 2–5 years?

- I aim to become a skilled software developer, contribute to impactful projects, and continue learning technologies relevant to web and application development.

6. Additional Notes

- Answers structured using STAR (Situation, Task, Action, Result).

- Practiced verbal delivery and clarity to prepare for future interviews.
